

Working in Health

Countrywide have a proven track record in the health sector, providing solutions to large and small scale works in Trusts throughout the North West.

Our risk mitigation planning has improved productivity in the sector, ensuring theatres, wards and support are adequately covered given the pressure on resource in so many institutions.

Full emergency support is provided 24/7, 365 days per year.

Value of works:

£1.5M

Scope:

Removal of asbestos in wards, communal areas, labs, theatres and boiler rooms

- Removal of lagging in boiler houses
- Working in service ducts
- Floor tile removal
- Textured coating removal
- AIB / Licensed works
- Soft strip demolition
- Risers
- Emergency works

Working in sensitive areas.

Countrywide work collaboratively to minimise disruption given the pressure of theatres, wards and supporting infrastructure.

We work closely with the Trust's appointed asbestos managers, safety teams and other contractors to meet their scope and requirements.

Effective communications with all stakeholders becomes critical to minimise anxiety, particularly where the public are in close proximity to works.

Our personnel are security cleared, and are trained to respond to visitors, patients and staff in any circumstance.

Challenges:

- Working at height
- Partially occupied premises
- Working round theatre and ward needs
- Requirement for boilers to remain operational
- Confined space working
